

How many living and non-living things can you see?

Class Information Park School Y2

Science big question
What do living things need to survive?

If a robot came to life, how would we test it to make sure that it's alive?

How do we know if something is dead?

This term, we will be SCIENTISTS. We'll learn about what living things need to survive, habitats and the life cycles of living things.

Where do animals like to live?

TYPES OF HABITATS

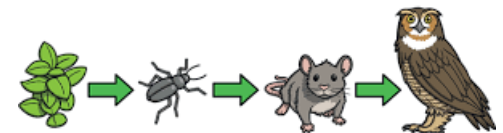

What tells us something has never been alive?
